

Certified Translation Services

Client: Public Sector German Government Organization
Category: Certified Document Translation
Location: Germany / India

Project Overview

A German public sector organization requires multilingual immigration documents translated into German for qualified professionals seeking to relocate and work in Germany. The documents have to meet strict state-specific standards and be delivered within tight timelines to support ongoing immigration procedures.

The Challenge

The client needs certified translations of official documents from English, Hindi, Tamil, Malayalam, Marathi, Arabic, and Kurdish into German. Each translation has to comply with the specific legal and documentation requirements of various German states, making accuracy and format compliance absolutely critical. Documents for translation include medical education transcripts, experience certificates and other legal documents like affidavits - so most documents have specialised medical or legal content. Every German state has a different requirement in terms of type of certification and stamping required. Monthly lots of documentation of immigrating medical experts are received and to be completed within the given timelines.

The Outcome

Language Services Bureau provides certified, stamped, and signed translations handled by native and expert German translators. All translations adhere to stringent state-specific formats and delivered within strict deadlines. The translated documents were successfully accepted by various German states, enabling a smooth and timely immigration process for the applicants. Till date, we have facilitated recognition of credentials of more than 200 medical experts from India in Germany by providing certified translations.
