

Commercial Translation Services

Client: India's Largest Tractor Manufacturer
Category: Commercial Translation Services
Location: India / Africa

Project Overview

An Indian tractor manufacturing giant needed expert commercial translation support to navigate cross-border government contracts in Africa. To ensure accuracy and protect their commercial interests, the company sought precise translation and validation of critical contract documents exchanged in French and English.

The Challenge

The client was bidding for a government contract in an African nation, and the tender's techno-commercial terms and contract agreements were in French. The client required fast, accurate French-to-English translations for internal review, and a back translation of the final contract amended by the client into French to confirm that the terms aligned with their business interests before signing.

The Outcome

Language Services Bureau translated the tender documents and agreement from French to English. Once the client made contract amendments as per their legal requirements, the contract was translated to French to ensure clarity and accuracy of every contractual clause. For the past three consecutive years, we have been supporting the client by translating their annual contracts, safeguarding their business terms and ensuring no detrimental clauses were overlooked in cross-language legal dealings.
